01 PROFILE

I am a realistic dreamer - both a student of a combined form of IT and a full-time UX designer.

I see my future in creating amazing apps that can make people's lives easier and want to do my job always more than 100%. I am eager to improve my design skills and learn a lot about new technologies. It is not just a job but also a hobby to me. (E.g. I was one of the Glass Explorers in Czech Republic. :)) Besides that I also enjoy being a part of a team and networking, so I participated on different events done by GUG.cz, where I was a volunteering organizer. Currently, I started a new project Chef Arena as a Producer.

I am considered a reliable, goal-oriented, and initiative person and most importantly I just love to gain new experience and learn from and with others. What I am looking for in a job is to become a part of a friendly team, share our knowledge, and help the brand grow and flourish - making the team effort matter.

In case you consider my CV interesting, I am open to a conversation over the phone or an interview. You can catch me on contact information listed above.

02 EMPLOYMENT HISTORY

Feb 2019 — Present

Prague

UX Evangelist at Unicorn a.s.

UX evangelist at Unicorn. I have designed corporate identity, web design, application's UI including user workflow planning. I have worked on dozens of projects / contracts from large international projects to small system components. In last year we started creating a new Graphic design system.

- Research design trends
- User experience (UX)
- Creating user flows
- Creating prototypes
- User Interface Design (UI)
- Creating new Design system
- Writing a documentation and design patterns.
- Sharing best practices between designers, developers and coders.

Feb 2018 — Feb 2019

Prague

Full Stack Developer at Unicorn a.s.

My first full-time experience as a part of a new developing team, where we specialize on creating progressive frontend and backend apps for clients using fresh approach. Mainly I'm using e.g. React, NodeJS, Java, MongoDB, UAF and etc.

Jun 2016 — Dec 2016

Prague

Performance Engineer at Vodafone Czech Republic

During the holiday break before my 1st year of college I was accepted to an internship programme at Vodafone, that ended up lasting half of a year. As a member of performance team my daily agenda consisted of database testing and data collection. The experience I gained from this opportunity that I value the most is team work.

Jan 2013 — Jun 2016

Prague

Sales Assistant at Apetit Praha

Part-time job during my high school studies consisting of managing a kiosk and providing professional customer service being responsible for the team, stocking, sales of goods and cash intake.

03 EDUCATION

Jun 2018 — Present

Prague

Unicorn University

After interrupting my studies on ČVUT I decided to go back to school to focus on Information Technologies with more practical approach, which is why I chose combined version of the bachelor programme.

[Unicorn University - Jan Švehla video](#)

Jun 2016 — Apr 2018

Prague

ČVUT Faculty of Electric Engineering

After 2 years I decided to interrupt my studies to focus on improving my practical skills.

Sep 2012 — Jun 2016

Prague

Gymnázium Arabská

4 years of specialization in programming in Java. Syllabus also consisted of web technologies, unix systems and algorithmization. Absolved yearly seminar projects and successfully finished with Maturita Exam.
